

Certified Ethical Hacker

**If you want to beat the attackers,
you've got to think like a hacker.**

**Using self-contained networks, hack
into simulated systems, and learn the
vulnerabilities of your own system
through the eyes of an attacker.**

EC-Council

Certified Ethical Hacker

Immerse your security officers, site administrators, and network managers in an interactive environment where they will be shown how to scan, test, hack, and secure a networked system.

This lab-intensive program offers the only certification in North America to validate your company's professionals have an in-depth knowledge and practical experience with:

- ◆ Perimeter Defenses
- ◆ Intrusion Detection
- ◆ Policy Creation
- ◆ Social Engineering
- ◆ DDOS Attacks
- ◆ Buffer Overflows
- ◆ Virus Creation
